

Intern Stage Gate Processen

<https://www.icdrachten.nl/vacatures/intern-stage-gate-processen/>

Bedrijf: Resato Hydrogen Technology B.V.

Locatie: Assen

Opleidingsniveau: HBO

Periode: Approx. 20 weeks

Stage: Ja

ASSIGNMENT DESCRIPTION:

As an intern Stage Gate Processes, you will support the QA department in further developing the Stage Gate Processes. You will define, elaborate on, and communicate the established deliverables. This can be done by documenting them for a process owner or by collecting and linking them to the relevant gate. Additionally, you will ensure that all changes are implemented in the stage gate, based on the testing of the process.

DESIRED QUALIFICATIONS:

- You are studying at HBO level in the field of Business Administration
- You are motivated, independent and proactive
- You have a critical mindset
- You are available from February 2025, for a period of \pm 20 weeks

WHAT DO WE OFFER:

- The opportunity to work at a rapidly growing, leading company that is continuously developing
- Direct supervision by the QA manager
- The opportunity to gain experience in aspects of quality management
- A competitive internship allowance
- Fresh fruit every day
- Freedom for initiatives and ideas
- The chance to make an active and valuable contribution to the company's work

PROCEDURE:

The internship starts in February 2025.

Are you excited after reading this intern vacancy and want to be part of an organization contributing to a greener future?
